

Speed-Door COAD-Series "Fine Dust, Noise cut off effect"

It features perfect sealing force because there is no joint

COAD have the COAD-Series that industrial door product which fine dust and noise cut off. According to COAD, due to the Standard Model COAD-1 and Recovery Type COAD-3 have a strong sealing power its has effective in blocking fine dust and noise.

The Recovery type COAD-3 is made of zipper type, so it is keep tightly sealing state when the door is close. Therefore, there is no gap for passing fine dust or noise, which helps to protect the product and improve the work environment.

And the Standard Model COAD-1 is made by assembling each sheet, so there is no joint and the bottom is finished with a safety wall. This model has the effect of blocking external polluted air, dust, and preventing leakage of noise and dust inside.

The COAD Speed-Door can be applied not only to the industrial field but also to the places where the logistics and the vehicle movement must be done quickly.
